Technology

- HTML, XSLT
- CSS/Sass, Bootstrap
- javascript/typescript
- jQuery
- react.js, redux
- next.js 13
- PHP
- SQL
- git, github, (Fork)

Additional skills

- Agile approach (Jira)
- Photo editing (Photoshop, Paint.NET)
- Knowledge of Microsoft office
- Category B driving license
- figma

Language skills

Hungarian

English

Professional experience

2022 March -

FULL-STACK WEB DEVELOPER

I took part in the development of a headless commerce system similar to Shopify, created by Pozsonyi Pagony Ltd. During my work, I mainly enriched the functionality of the webshops' React-based admin interface and implemented changes on pagony.hu and the frontend of its partner websites. I fully executed the implementation of new features both on the frontend and PHP backend using the company's own framework. Such developments included watermarking e-books and integrating third party features.

2020 - 2021

LABORATORY WORK

I performed organic syntheses at ELTE Catalysis and Organic Synthesis Research Group, then I examined the produced molecules by NMR and GC-MS.

Educational attainment

2021 - 2022 - 2 completed semesters

COMPUTER ENGINEERING BSC correspondent

Széchenyi István University

2017 - 2021

CHEMISTRY BSC full-time

Eötvös Lóránd University

2016 - 2017

CHEMICAL TECHNICAN

Petrik Lajos Bilingual Vocational School of Chemistry, Environmental Protection and Information Technology
